sinparty lovense setup

This collection of how-tos explains how to set up your Lovense devices for use on the website.

Currently, there are four different methods to connect and use your Lovense device, each with its own level of setup complexity and feature support.

METHOD 1: CREATOR DASHBOARD WITH LOVENSE CONNECT DESKTOP (EASY SETUP)

Overview:
This method involves using a web browser on your computer to connect to your desktop through a Lovense dongle, which in turn connects to your Lovense device.

Steps:
1. Download Lovense Connect App: On your desktop, download the Lovense Connect app from the Lovense site.
2. Pair Your Device: Open the Lovense Connect app and follow the instructions to pair your Lovense device with your dongle.
3. Download the Lovense Cam Model Extension: On the browser you are going to use with the creator dashboard, download and install the Lovense Cam Model Extension.
4. Login to the Lovense Cam Model Extension: On the browser you are going to use with the creator dashboard, click the Lovense Cam Model Extension and log in with a Lovense account.
5. Log in to the Creator Dashboard: Open your preferred web browser and log in to your account on the Creator Dashboard.
6. Connect to the Creator Dashboard: On the Creator Dashboard, under the show controls section, you should see your device connected message.
7. Start Using Your Device: Once connected, you can start using your Lovense device through the Creator Dashboard.

Pros:
• Easier and quicker setup.

Cons:
Requires a Lovense dongle for the connection.

METHOD 2: CREATOR DASHBOARD WITH LOVENSE CONNECT MOBILE (HARD SETUP)

Overview:
This method involves using a web browser on your computer to connect to your mobile phone, which in turn connects to your Lovense device.

Steps:
1. Download Lovense Connect App: On your mobile phone, download the Lovense Connect app from the App Store (iOS) or Google Play Store (Android).
2. Pair Your Device: Open the Lovense Connect app and follow the instructions to pair your Lovense device with your phone.
3. Download the Lovense Cam Model Extension: On the browser you are going to use with the creator dashboard, download and install the Lovense Cam Model Extension.
4. Login to the Lovense Cam Model Extension: On the browser you are going to use with the creator dashboard, click the Lovense Cam Model Extension and log in with a Lovense account.
5. Pair Your Device: On the Lovense Cam Model Extension page, use the Connect by mobile option to pair your device.
6. Log in to the Creator Dashboard: Open your preferred web browser and log in to your account on the Creator Dashboard.
7. Connect to the Creator Dashboard: On the Creator Dashboard, under the show controls section, you should see your device connected message.
8. Start Using Your Device: Once connected, you can start using your Lovense device through the Creator Dashboard.

Pros:
• No additional hardware required.

Cons:
• Requires a mobile phone for the connection.

CONCLUSION:
Choose the method that best suits your needs and follow the detailed steps to get your Lovense device connected and ready for use on our website.
